Grade: A4

Strengths

- Software Engineer who is passionately interested in the field of DevOps and working with Automation tools.
- I have experience of Hands-on with distributed version control system, Continuous Integration tool, Containerization tools, Configuration Management tool and Container management tool.
- Happy to work in a team of dedicated people and serve a key role in the enhancement and development of the project.

Achievement

Dual Access on cloud based data storage and sharing:

Simply encrypting data cannot fully address the need of data management. Besides, an effective access control over download request also needs to be considered. So that Economical denial of sustainability attacks cannot be launched to hinder users from enjoying service. In the sense that we designed a control mechanism over both data access and download request without loss of security and efficiency.

Education and certificates

Bachelor of Engineering
Electrical and Electronics
Engineering : 2017 - 2021

Skills

C
Python
Jenkins
Maven
Groovy
Gradle
Docker
Kubernetes
Ansible
Terraform
Git and Git hub
Unix & Shell Scripting
AWS

Certifications

Jenkins course certification
Docker course Certification
Agile software Development
Shell scripting and Linux commands
Certification
AWS cloud practitioner certification
Python course certification
